PROFESSIONAL SUMMARY

Software Engineering graduate (B.S., Arizona State University, GPA 3.98, Summa Cum Laude) with hands-on experience designing scalable backend systems and full-stack applications in Java, Spring Boot, React, and AWS. Delivered six end-to-end projects spanning payments, distributed systems, real-time messaging, and AI integration. Authorized to work in the U.S. without current or future sponsorship.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript, C#, C/C++, SQL, HTML, CSS, Bash
Backend & APIs:	Spring Boot, Node.js, Express, Flask, REST, GraphQL, Microservices, JWT, WebSockets, gRPC
Frontend:	React, Vue.js, Angular, HTML5, CSS3, Responsive UI
Cloud & DevOps:	AWS (EC2, S3, RDS, DynamoDB), Docker, GitHub Actions, CI/CD, Linux/Unix, Git
Databases:	MySQL, PostgreSQL, MongoDB, SQLite, Redis
Testing & Methods:	JUnit, Selenium, Postman, Unit/Integration Testing, Agile/Scrum, Code Reviews, OOP, Secure Coding
System Design:	Distributed Systems, Concurrency, Multithreading, Caching, Load Balancing, Scalability
AI/ML:	OpenAI API, Generative AI, Prompt Engineering, REST-based AI Integration

PROJECTS

Event Booking and Payment Processing System | *Java, Spring Boot, MySQL, REST APIs, Stripe API*

- Built a secure payment-processing backend integrated with Stripe API, handling authorization, settlement, and refund flows across concurrent user sessions with parameterized queries and input validation.
- Implemented database-level locking and transactional consistency in MySQL to prevent double-booking under high request load; designed RESTful APIs in Spring Boot with comprehensive error handling.

Real-Time Notification System | *Java, Spring Boot, WebSockets, Redis, REST APIs, AWS*

- Architected a distributed real-time messaging service using WebSockets and Redis Pub/Sub to deliver instant notifications across thousands of concurrent connections; designed for horizontal scaling on AWS.
- Built scalable Spring Boot microservices with asynchronous message handling; wrote JUnit unit and integration tests to validate race conditions, edge cases, and message delivery guarantees under load.

Full-Stack E-Commerce Platform | *Java, Spring Boot, React, MySQL, REST APIs, JWT*

- Developed a production-style e-commerce application supporting product browsing, cart management, checkout, and order processing for 500+ daily transactions with JWT-based authentication and role-based access control.
- Designed normalized MySQL schemas with indexed queries and connected React frontend to Spring Boot REST APIs, reducing average checkout latency by 25% and ensuring data consistency under concurrent load.

NASA Psyche Mission Educational Game | *Unity, C#, REST APIs, Agile, Git, AWS* | [Live Site](#)

- Built interactive gameplay systems and mission-based simulations in Unity (C#) for NASA's Psyche outreach; collaborated in an Agile team via two-week sprints, code reviews, testing, and iterative releases.

AI-Powered Language Learning Web App | *Python, Flask, Angular, OpenAI API, MySQL*

- Integrated OpenAI's API into a Flask + Angular web application serving 200+ learners with adaptive vocabulary and grammar feedback, improving answer accuracy by 40%; covered with unit and integration tests.

EXPERIENCE

JPMorgan Chase & Co. | Operations Lead

January 2026 to Present | Atlanta, GA

- Operating within a Fortune 50 regulated financial enterprise, gaining direct exposure to compliance, audit, and risk workflows applicable to enterprise software; identified inefficiencies and implemented data-driven process improvements that reduced transaction errors.

The Global Career Accelerator | Software Engineer (Program)

July 2025 to May 2026 | Remote

- Built and deployed full-stack web applications using HTML, CSS, JavaScript, and backend services; delivered features through Agile sprints, code reviews, and Git-based collaboration with clean code principles and incremental release cycles.

EDUCATION

Arizona State University | Ira A. Fulton Schools of Engineering

Bachelor of Science in Software Engineering | **GPA: 3.98 / 4.00** | **Summa Cum Laude** | Dean's List | August 2022 to May 2026 | Tempe, AZ

Relevant Coursework: Algorithms and Data Structures, Object-Oriented Programming, Software Architecture, Database Management, Distributed Software Systems, Engineering Secure Software Systems, Operating Systems and Systems Programming, Web-Based Applications, Mobile Systems, Software Analysis and Design.
