SUMMARY

Software Engineering graduate (B.S., Arizona State University, GPA 3.98, Summa Cum Laude) focused on backend and distributed systems, with full-stack capability across Java, Spring Boot, React, and AWS. Built end-to-end projects spanning payment processing, real-time messaging, and AI integration. Strengths in REST/GraphQL API design, relational data modeling, and concurrency. Authorized to work in the U.S. without current or future sponsorship.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, C#, C/C++, SQL, HTML, CSS, Bash

Backend & APIs: Spring Boot, Node.js, Express, Flask, REST, GraphQL, gRPC, Microservices, JWT, WebSockets

Frontend: React, Vue.js, Angular, HTML5, CSS3, Responsive UI

Cloud & DevOps: AWS (EC2, S3, RDS, DynamoDB), Docker, GitHub Actions, CI/CD, Git, Linux/Unix

Databases: MySQL, PostgreSQL, MongoDB, SQLite, Redis

Testing & Methods: JUnit, Selenium, Postman, Unit/Integration Testing, Agile/Scrum, Code Reviews, OOP, Secure Coding

System Design: Distributed Systems, Concurrency, Multithreading, Caching, Load Balancing, Scalability

AI/ML: OpenAI API, Generative AI, Prompt Engineering, REST-based AI Integration

PROJECTS

Event Booking & Payment Processing System | *Java, Spring Boot, MySQL, REST APIs, Stripe API*

- Built a secure payment-processing backend integrated with the Stripe API, handling authorization, settlement, and refund flows across concurrent user sessions with parameterized queries and server-side input validation.
- Implemented database-level locking and transactional consistency in MySQL to prevent double-booking under concurrent requests; designed RESTful Spring Boot endpoints with structured error handling.

Real-Time Notification System | *Java, Spring Boot, WebSockets, Redis, REST APIs, AWS*

- Architected a distributed real-time messaging service using WebSockets and Redis Pub/Sub for instant push notifications, designed for horizontal scaling on AWS.
- Built Spring Boot microservices with asynchronous message handling; wrote JUnit unit and integration tests covering race conditions, edge cases, and delivery guarantees.

Full-Stack E-Commerce Platform | *Java, Spring Boot, React, MySQL, REST APIs, JWT*

- Developed a full-stack e-commerce application supporting product browsing, cart management, checkout, and order processing, with JWT-based authentication and role-based access control.
- Designed normalized MySQL schemas with indexed queries and connected a React frontend to Spring Boot REST APIs, with a focus on data consistency under concurrent access.

AI-Powered Language Learning Web App | *Python, Flask, Angular, OpenAI API, MySQL*

- Integrated the OpenAI API into a Flask + Angular application delivering adaptive vocabulary and grammar feedback; applied prompt engineering for response quality and covered core logic with unit and integration tests.

EXPERIENCE

JPMorgan Chase & Co.

January 2026 – Present

Operations Lead | Atlanta, GA

- Operate within a Fortune 50 regulated financial enterprise with direct exposure to compliance, audit, and risk workflows relevant to enterprise software; identified process inefficiencies and implemented improvements that reduced transaction errors.

Mission to Psyche (NASA)

June 2025 – May 2026

Capstone Software Developer | Tempe, AZ (Hybrid)

- Built “Corebound: The Metal Mission,” a publicly released educational game for NASA’s Psyche Mission outreach program, teaching mission science to middle-school learners through the official Mission to Psyche portal.
- Developed gameplay systems and interactive UI in Unity (C#) across six mini-games and integrated REST APIs for dynamic content; led code reviews, testing, and performance work across two-week sprints with NASA sponsor stakeholders.

The Global Career Accelerator

January 2025 – May 2025

Software Engineer Intern | Remote

- Built and deployed full-stack web features using JavaScript and backend services, delivered through Agile sprints, code reviews, and Git-based collaboration with clean-code practices.

EDUCATION

Arizona State University — Ira A. Fulton Schools of Engineering

B.S. in Software Engineering | GPA 3.98 / 4.00 | Summa Cum Laude, Dean’s List | Aug 2022 – May 2026 | Tempe, AZ

Relevant Coursework: Distributed Software Systems, Software Architecture, Algorithms & Data Structures, Database Management, Engineering Secure Software Systems, Operating Systems.
